Dear CertainTeed Roofing Customers,

CertainTeed Landmark® PRO – Now UL 2218 Class III Impact Rated

CertainTeed is excited to announce that our **Landmark® PRO shingles are now UL 2218 Class III Impact Rated**. The products were tested and carry the certification of **the Paving, Roofing & Industrial (PRI) Validation Program for Building Materials**.

Landmark® PRO products that were manufactured in 2022 and beyond are officially classified as UL 2218 Class III Impact Rated. Labeling and packaging requirements will be updated throughout 2023.

There is no impact to current inventory and this will not cause a Do Not Mix situation.

Class III Impact Rated shingles may qualify for additional insurance benefits, so please be sure to work with local insurance agencies to obtain the specific benefits in your area.

CertainTeed is focused on innovation and continues to strive towards providing the highest quality products and service to our customers. If there are any questions, please contact your local Territory Manager.

Thank you for your continued support of CertainTeed Roofing.

Best regards,

Alexandre Pecora
Director of Product Management
